CENTRAL INTELLIGENCE GROUP

-2-

and guns. The output in July amounted to 7,000 pistons for cars. The rate of output in the rolling mill is twelve to thirteen car loads (25 to 30 ton cars) of barrels, in a raw state, ready for boring holes. Rustless metal sheets production amounts to thirty to forty 15-ton cars per month. Observation has shown that although cars are labelled "Chorzow" (Silesia), the trains are actually sent to Lublin and Przemysl.

- 7. The mechanical department is making moulds of two mm metal sheets swaged for the manufacture of special bricks which are being made of the rubble from the ruins of Jarsay. This production is destined for private firms. This too is the only department making profit to cover the cost of staffs of other departments. In May the orders for these moulds placed with the plant amounted to 27 million items, at a price of 100 zlotys per item.
- 8. The rechardeal department is also making complete installations for the oil plant which is being erected in the Lublin region, and recently received orders for three more oil plants; the price of one set of installations for the oil plants is one/one-half million zlotys.
- 9. In every department of the factory there are tables calculating the production in percentages. On this production percentage the pay of the workers is based. 50X1-HUM

In July the production percentage of the steel.

mill was 122 percent, that of the rolling mill 147 percent and that of the forge

145 percent.

The

50X1-HUM

basic wages are divided into groups: the foreman electrician is paid 7.10

zlotys per hour (17th pay group); the second electrician 7.90 zlotys per hour

(18th pay group); the third electrician 8.40 zlotys per hour (19th pay group).

Electricians working in the substations (21st pay group) are paid 9.40 zlotys

per hour.

Food ration cards are issued at the end of the month.

Soap was issued two months late;
this was blamed on the headquarters and the delays in UNRA supplies.

50X1-HUM

ll. <u>Political</u>

Among the workers of Stalowa Wola there are 274 members of the PFR, 640 members of the PFS, and 6,000 without any party allegiance. The PSL, the Labor Party (Stronnictuo Pracy), the SD, and SL, are not represented in the factory. Elections to Factory Councils, Trade Unions and for Delegates of Social Welfare always take place in such a manner that the management appoints candidates from among PFR adherents (or persons whose allegiance to the PFR is secret), and presents them as reliable and trustworthy people. There is no possibility of proposing other candidates. On one occasion one of the non-party members was elected. After the election he was entrusted with the task of distributing some old clothes, and was immediately accused of having carried out this task unfairly and a new election was ordered.
